'Shores' Is One

How many words can you spell from "sisterhood"?

At the Beach

The combination of sand and surf creates scenic coastlines across the world. Relax, unwind and find out what makes some beaches fascinating and fantastic.

- Beaches became popular destinations during the 1700s. Doctors often prescribed a visit to the seashore to improve a person's health.
- Most beach sand is tan or white in color, but there are beaches with sand that's black, green, pink, purple and red.
- Brazil is home to the world's longest beach, Casino Beach, which stretches 150 miles long.
- You'll find the "shark tooth capital of the world" at Venice Beach in Florida. Every year, hundreds of fossilized teeth from prehistoric sharks wash ashore there.
- At 58 feet high, the world's tallest sandcastle was built on a German beach in 2019.
- Tides have turned California's Glass Beach from trash to treasure. Its shore is covered with polished pebbles of colorful sea glass, made from garbage tossed into the ocean long ago.
- A day at the beach or the spa? You can have both at New Zealand's Hot Water Beach, where the water underneath the beach heats up to 150 degrees. Beachgoers dig holes in the sand to soak in their own hot tubs.
- It's the wildlife that makes some beaches unique. Sea turtles, penguins, flamingos, monkeys and pigs are just some of the animals that roam the shores along with human visitors.
